ABOUT ME

Systems Engineer graduated from Universidad Nacional de Trujillo, specializing in mobile development and full-stack solutions (Flutter, React, Laravel). Proven experience in Clean Architecture, offline-first synchronization, RESTful API development, and seamless integration with ERP systems and hardware peripherals. Autonomous mindset focused on solving mission-critical operational challenges and architecting scalable, high-performance software.

SKILLS

Frontend: React, Next.js.
Mobile: Flutter, Android, iOS, React Native, SQLite, Workmanager, Offline-First.
Backend & APIs: PHP (Laravel), Node.js (NestJS), Python (FastAPI), RESTful APIs, Odoo Integration.
Bases de Datos & Cloud: PostgreSQL, MySQL, Supabase, Firebase, Google Cloud, SQL
Deploy & Herramientas: Google Play Console, App Store Connect, Git, CI/CD, DigitalOcean.

EXPERIENCE

2026 – PRESENT | FLUTTER SOFTWARE ENGINEER

- **Scanner & Document Management:** Built an offline-first mobile app (SQLite + Workmanager) to scan and digitize shipping bills (GRTs) and signed delivery receipts connected to Odoo ERP, accelerating on-route billing.
- **Sync & CPU-Aware:** Engineered batch background synchronization with adaptive throttling based on Odoo server CPU load and daytime bypass rules.
- **Operations & Distribution:** Implemented the route control and delivery app using Clean Architecture (Riverpod), anti-fraud validation via NTP time/odometer photo proofs, and read-only manifest security.

Transportes Montano – Lima, Peru

2026 – PRESENT | MOBILE & FULL STACK DEVELOPER

- **Digital Kiosks & Multi-Tenant Architecture:** Developed interactive self-service kiosks (Flutter) featuring a modular white-label architecture, payment gateway integrations, and custom hardware peripherals.
- **Web Admin Panel & Backend (Laravel + React):** Built the RESTful API and PostgreSQL data persistence using Laravel, alongside a React administrative panel for commercial management and operational support.

TechBot – Lima, Peru

2025 - 2026 | FLUTTER MOBILE DEVELOPER – INTEGRATIONS SPECIALIST

- Built a logistics application featuring real-time GPS tracking, local persistence, and background synchronization.
- Led end-to-end development (Flutter + FastAPI/Node.js) of a customer loyalty platform with reward redemptions, user analytics, and catalog management.

Sistematic del Peru– Lima , Peru

2024 - 2025 | FLUTTER MOBILE DEVELOPER

- Maintained and optimized an enterprise app with biometric authentication (facial recognition) and document approval workflows.
- Designed and built the Time & Attendance module from scratch for shift scheduling, cost centers, and attendance tracking with dynamic calendar visualization.

Simbiosys – Trujillo, Peru

PERSONAL PROJECTS

2025 - 2026| ADIPIX: AI-POWERED FITNESS APP

- Developed a mobile application leveraging computer vision for anthropometric body composition estimation directly from images.
- Implemented reactive state management architectures, advanced UI animations, and automated generation of customized nutrition and workout plans.

EDUCACIÓN

2021 - 2026 | UNIVERSIDAD NACIONAL DE TRUJILLO
Bachelor of Science in Systems Engineering
