Systems Engineer specializing in mobile development and Full Stack solutions (Flutter, React, Laravel). Experienced in designing scalable architectures (Clean Architecture), offline-first data synchronization, and RESTful API integrations with ERPs (Odoo) and hardware/peripherals. Self-driven engineer focused on streamlining critical operations and building high-performance, robust software.

### SKILLS

- Primary Stack: Flutter, Dart, React, Laravel, MySQL, RESTful APIs.
- Secondary Stack: Nest.js, Python (FastAPI), Next.js, SQL, Native Android/iOS, React Native.
- Cloud & Tools: Git, CI/CD, Google Cloud (GCP), Supabase, Firebase, DigitalOcean, Odoo ERP Integration.

## WORK EXPERIENCE

### FLUTTER SOFTWARE ENGINEER (CONTRACTOR)

Transportes Montano - April 2026 - Present

- Tax authority compliance integration: real-time electronic waybills & cargo dispatch validation, package pickup/delivery management, mileage tracking, and anti-fraud verification (Flutter, Riverpod).
- Offline-first app for cargo documentation connected to Odoo ERP: on-route digitization and billing with CPU-adaptive background synchronization (SQLite, Workmanager).

### MOBILE & FULL STACK DEVELOPER (CONTRACTOR)

TechBot - April 2026 - Present

- Self-service kiosk solution: automated unattended ordering and checkout through peripheral hardware integration and payment gateways (Flutter, white-label architecture).
- Operational and business centralization: administrative web dashboard and core API for transaction monitoring and business support operations (React, Laravel, PostgreSQL).

### FLUTTER MOBILE DEVELOPER (INTEGRATIONS)

Sistematic del Peru - Sep 2025- Feb 2026

- Last-mile logistics tracking: real-time delivery monitoring with offline support in low-connectivity areas via GPS tracking and local data synchronization.
- End-to-end loyalty platform: full-cycle management of reward redemptions, product catalog, and user metrics tracking (Flutter, FastAPI, Node.js).

### FLUTTER MOBILE DEVELOPER

Simbiosys - Mar 2024 - May 2025

- Corporate security and workflows: streamlined internal document approvals and integrated facial recognition biometric authentication.
- Workforce operations management: end-to-end design and implementation of the workforce logging module for shift scheduling, attendance logging, and cost center allocation via an interactive calendar.

### EDUCATION

Bachelor of Science in Systems Engineering — Universidad Nacional de Trujillo | 2021 - 2026
